

Origami cat face

One square and two upright ears

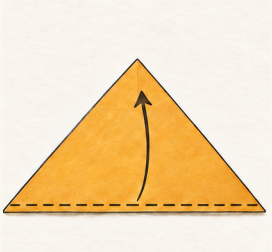

Thin 15 × 15 cm square, colored front and pale reverse. Fold the prepared square without scissors or glue.

Dashed line: new fold; fine line: previous crease; arrow: movement.

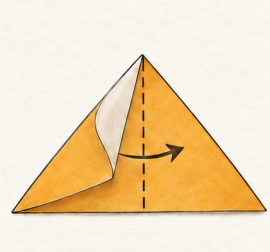

1. Place the square

Put the square pale side up, with one corner pointing toward you.

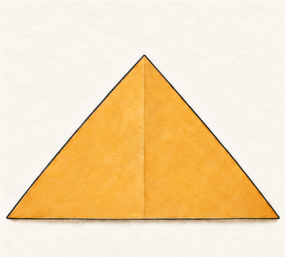

2. Make a triangle

Bring the bottom corner to the top corner. Match the edges and press the diagonal.

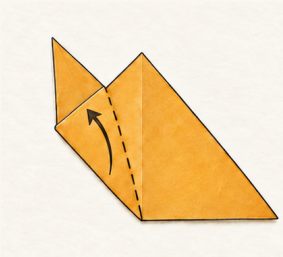

3. Mark the center

Bring the left corner to the right corner through both layers. Press the vertical fold lightly.

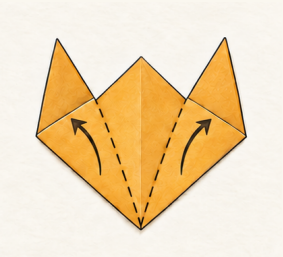

4. Open the triangle

Open only the last fold. Keep the original diagonal closed and the apex pointing up.

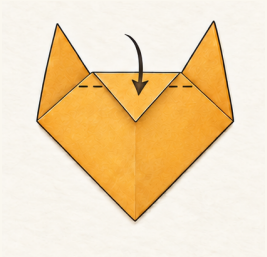

5. Raise the left ear

Lift the left corner through both layers. Pivot from the base midpoint and point the tip upward, outside the central apex.

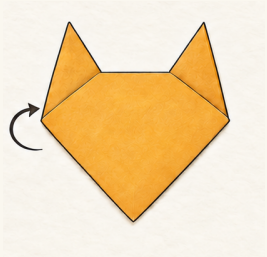

6. Raise the right ear

Lift the right corner through both layers. Mirror the left hinge and compare the two ear tips before pressing.

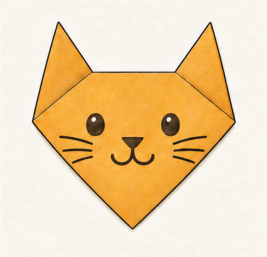

7. Lower the forehead

Fold the central top point down through both layers. Place its horizontal hinge below both ear tips.

8. Turn the whole model

Turn the entire model over from left to right. Keep the ears at the top and all folds closed.

9. Draw a face

Draw eyes, a small nose and whiskers on the smooth front. Support the paper on a flat table.
