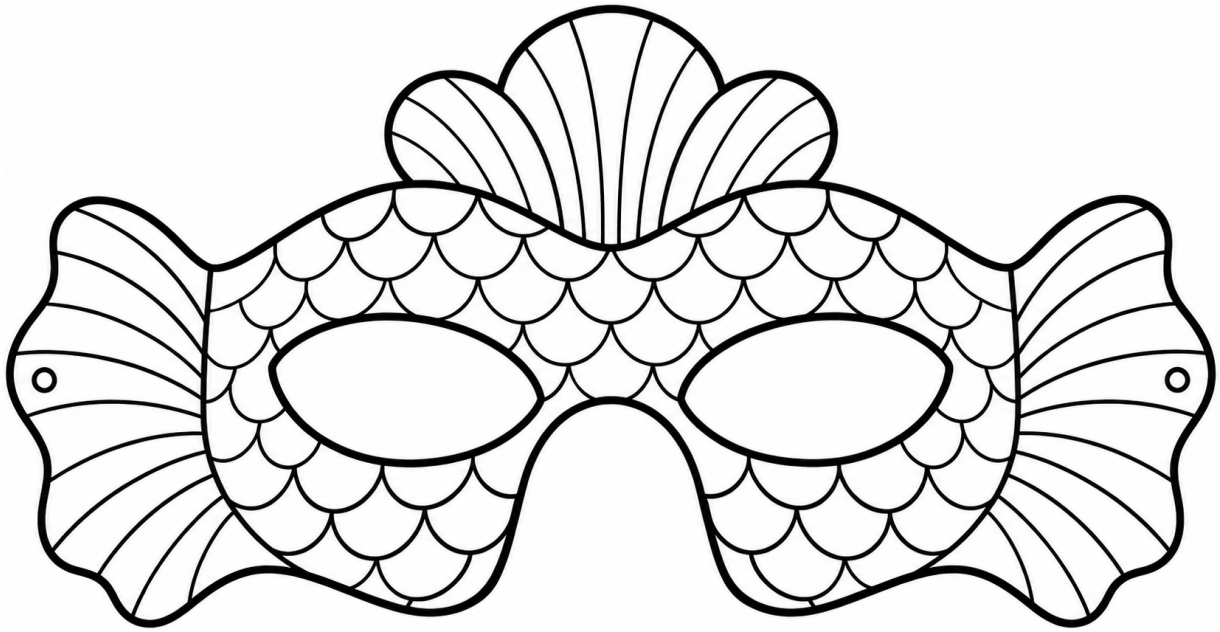
Pearl fish

Child trial size · width 160 mm

Eye-opening centre distance: 54.0 mm. Print at 100%, no “Fit to page”.



Cut the outer contour. An adult cuts eye openings and fastening holes. Keep the nose and mouth open. Hold without elastic first: check forward and sideways vision.

Remove if edges touch the eyes or the mask presses. Reinforce the color version with card; color the outline version before cutting. Reinforce fastening points on the back.

50 mm — check with a ruler

Physical print and fitting checks are pending. Size does not guarantee a fit by age.
