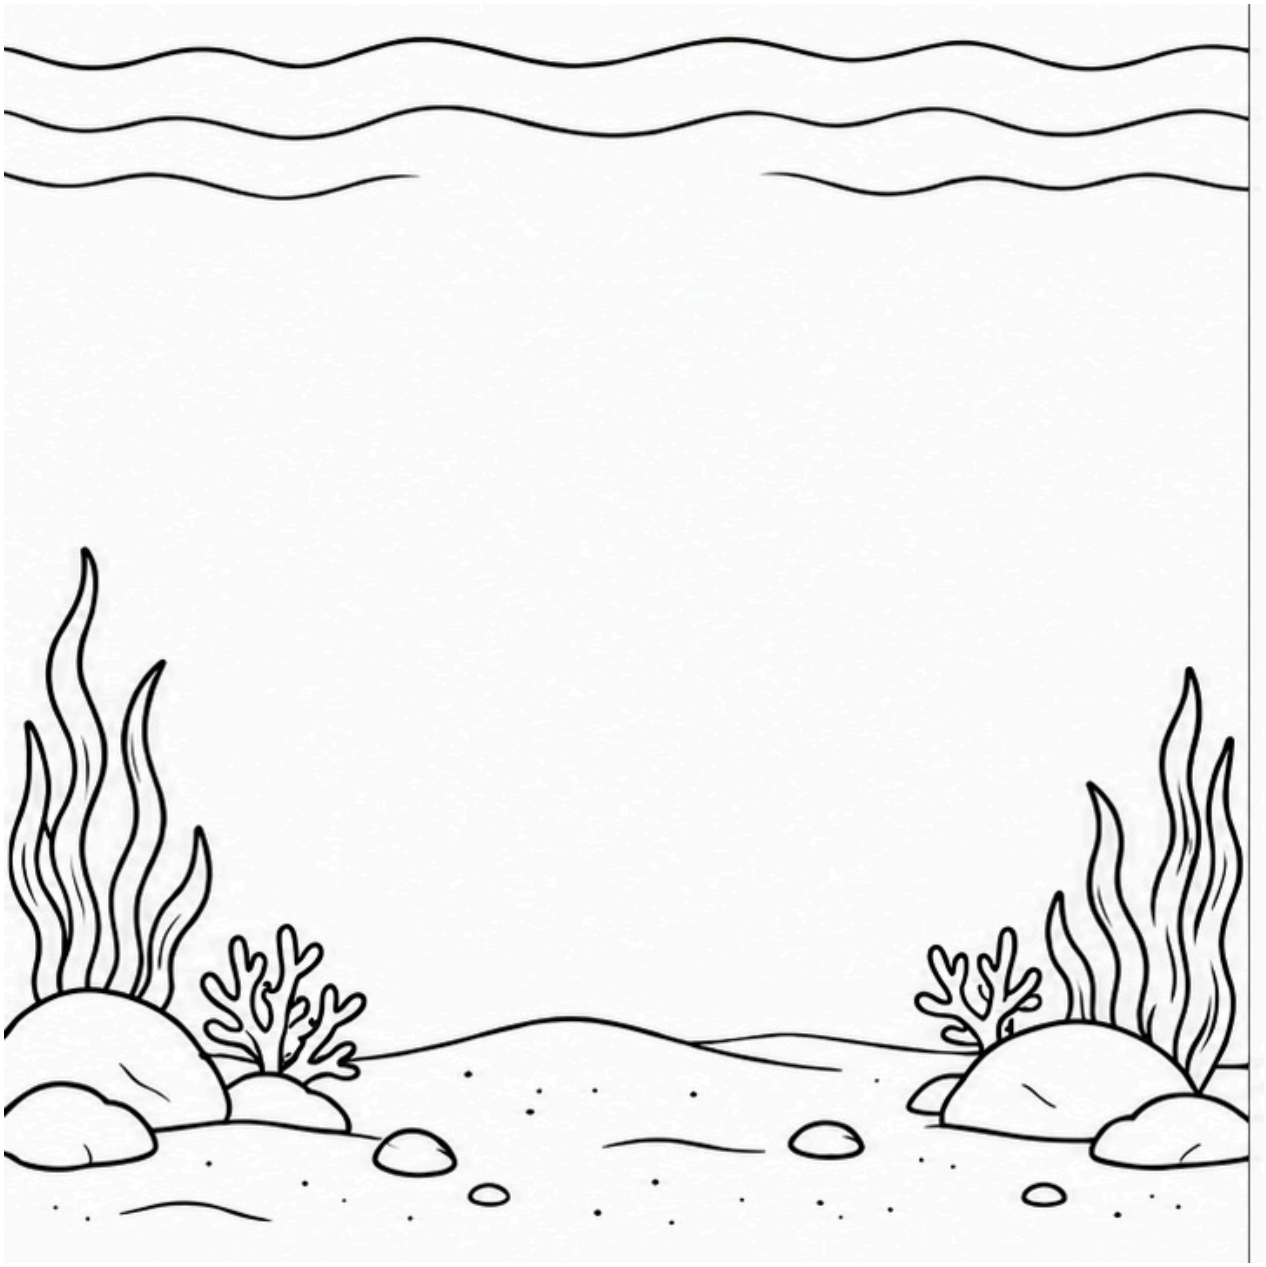
Shark in open water

Background — keep this sheet whole

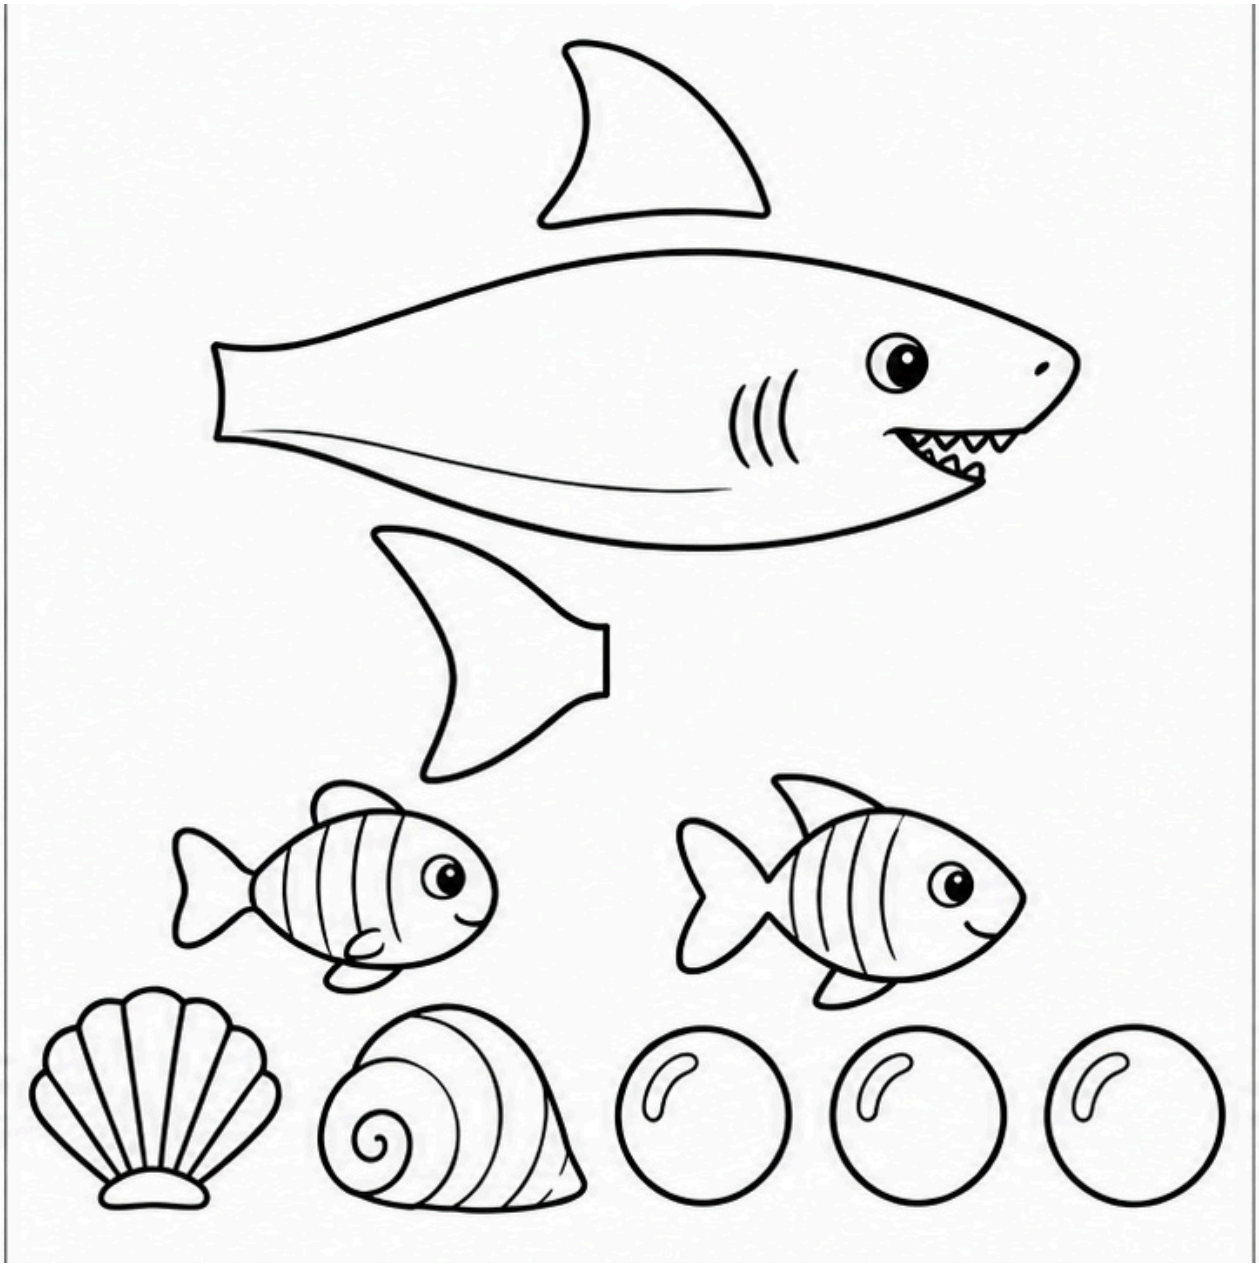


Print at 100%, with the same scale on both pages.

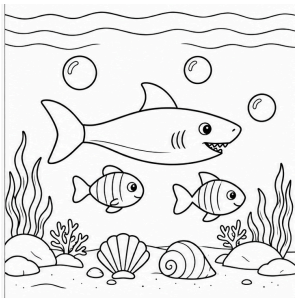
Keep the background whole. Page two has the pieces and a small example.

Shark in open water

Pieces — cut with adult help



Example



Color before cutting. Arrange the pieces without glue, then glue in layer order.

1. Tail and top fin behind the body.
2. Body over both joins, facing right.
3. Place the two little fish in open water on either side.
4. Put two shells on the bottom and three bubbles above.

Check: joins covered, eye visible.

Repair: move the body over the join before gluing.
