Flying fish over waves

Background — keep this sheet whole

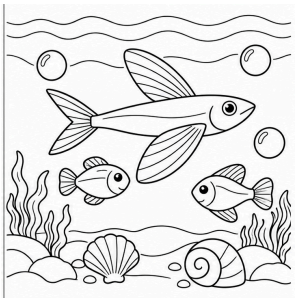

Print at 100%, with the same scale on both pages.

Keep the background whole. Page two has the pieces and a small example.

Flying fish over waves

Pieces — cut with adult help

Example

Color before cutting. Arrange the pieces without glue, then glue in layer order.

1. Tail and upper wing fin behind the body.
2. Body over the joins, facing right.
3. Lower wing fin on the lower body edge.
4. Place the two little fish in open water on either side.
5. Put two shells on the bottom and three bubbles above.

Check: joins covered, eye visible.

Repair: move the body over the join before gluing.
