Fan-wing butterfly

Background — keep whole

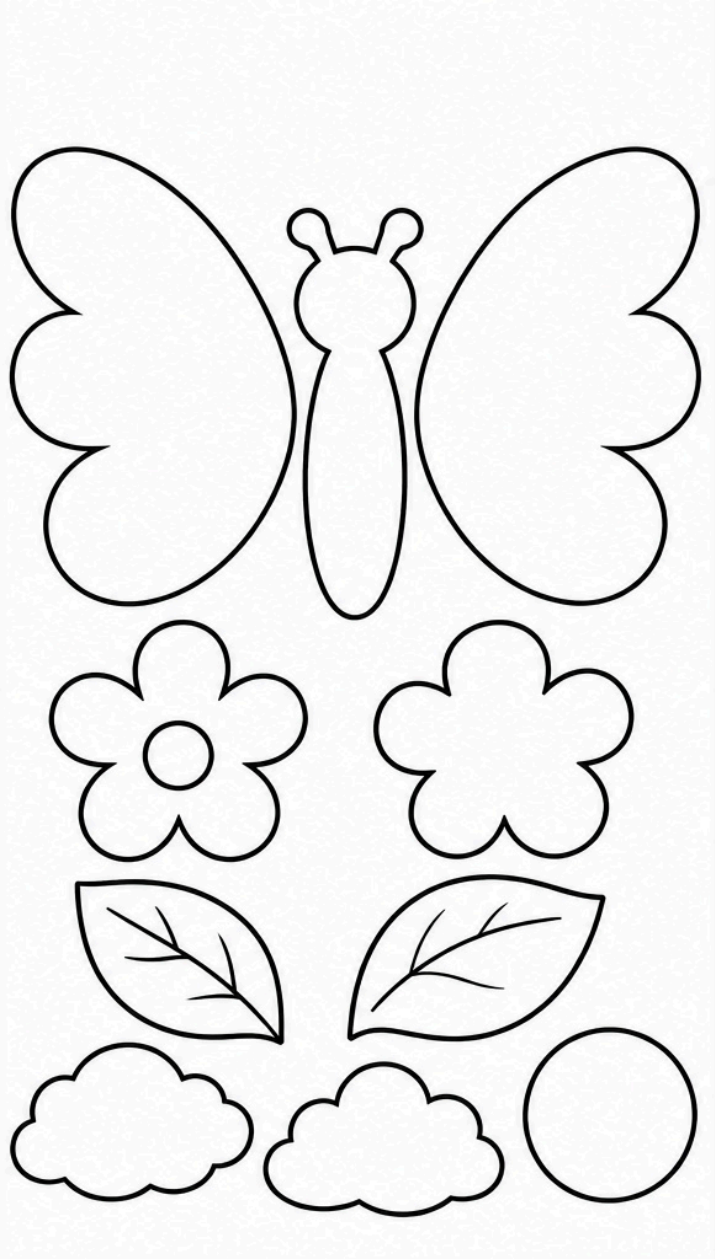

Print both pages at 100% with the same settings.

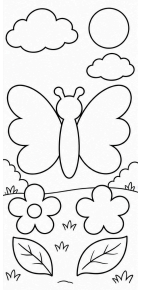

Keep the background whole. Pieces and a small example are on page two.

Fan-wing butterfly

Pieces to cut out

Example — not a piece

Color before cutting. Arrange every piece without glue, then glue in layer order.

1. Two wings side by side, inner edges toward the center.
2. Body over the inner wing edges.
3. Place two flowers and two leaves in open ground space.
4. Place two clouds and the sun in the sky; choose your own positions.

Check: all pieces have a place and the body stays visible. If a join shows, slide the wing farther under the body before gluing.
