

Origami corner bookmark

One square, one pocket, one useful page marker.

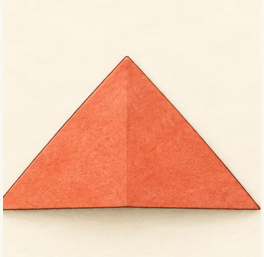

One thin 15 × 15 cm square; no cutting, glue or scissors.

Dashed: new fold; fine line: earlier crease; arrow: movement.

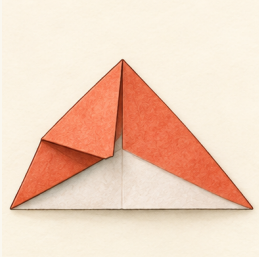

1. Place the square

Put the colored side down with one corner pointing toward you.

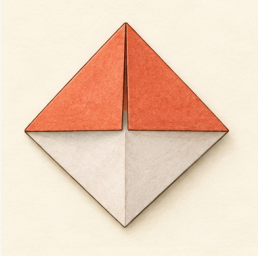

2. Make a triangle

Bring the bottom corner to the top corner. Match both side edges, then press the diagonal.

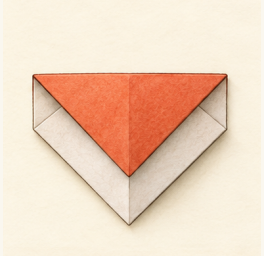

3. Mark the middle

Bring the left corner to the right corner, crease lightly, then reopen the triangle.

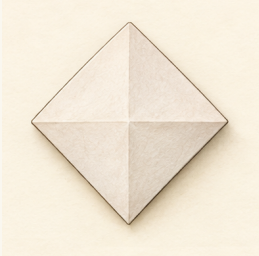

4. Fold both pocket sides

Bring the left and right corners to the center crease, one at a time, and press their sloping folds.

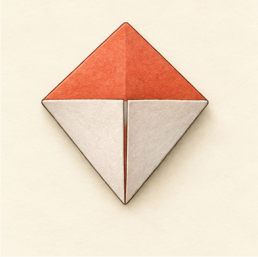

5. Lower the top flap

Fold the top point down over the meeting flaps, stopping at the straight base edge.

6. Turn the model

Turn the whole model over from left to right. Keep the point down and all folds closed.

7. Tuck the point

Fold the bottom point up into the pocket, sliding its tip behind the top flap to the center.

8. Test the corner

Slip the bookmark over one book-page corner. Press the top and side edges gently.

9. Add a small mark

Draw a pencil star or dot on the front, keeping ink away from the folded pocket.
