Sea turtle over coral

Background — keep this sheet whole

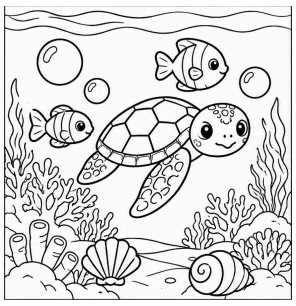

Print at 100%, with the same scale on both pages.

Keep the background whole. Page two has the pieces and a small example.

Sea turtle over coral

Pieces — cut with adult help

Example

Color before cutting. Arrange the pieces without glue, then glue in layer order.

1. Two flippers behind the lower shell edge.
2. Shell over the flipper joins; turn it sideways.
3. Head over the right shell edge.
4. Place the two little fish in open water on either side.
5. Put two shells on the bottom and three bubbles above.

Check: joins covered, eye visible.

Repair: move the body over the join before gluing.
