Goldfish in a pond

Background — keep this sheet whole

Print at 100%, with the same scale on both pages.

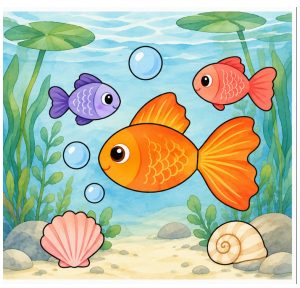

Keep the background whole. Page two has the pieces and a small example.

Goldfish in a pond

Pieces — cut with adult help

Example

Arrange the pieces without glue, then glue in layer order.

1. Tail and top fin behind the body.
2. Body over the joins, facing left.
3. Place the two little fish in open water on either side.
4. Put two shells on the bottom and three bubbles above.

Check: joins covered, eye visible.

Repair: move the body over the join before gluing.
